

ZHANG Hanlin

E-mail: hanlinzhang@link.cuhk.edu.cn

Educational Background

The Chinese University of Hong Kong, Shenzhen	09/2025-07/2027
Master of Philosophy Student in Artificial Intelligence with GPA: 3.66/4.0	
Fuzhou University (211), Fujian Province, China	09/2021-07/2025
Bachelor of Engineering in Automation with GPA: 3.74/4.0	

Publication

- **Hanlin Zhang**, et al. “WSM-Aware HRI: An IoT-Enhanced Framework for Early Detection and Norm-Guided Repair of Failures with LLM Guidance” *ACM Transactions on Human-Robot Interaction*, accepted for publication.
- **Hanlin Zhang**, et al. “Rotated Object Detection Based on Improved Hough Transform”, Proc. SPIE 13180, International Conference on Image, Signal Processing, and Pattern Recognition (ISPP 2024), EI Conference.
- **Hanlin Zhang**. “Object Recognition and Optimal Grasping Pose Detection for Industrial Robot Grasping”, Undergraduate Thesis.

Internship

VIVO Communication Technology Co., Ltd. - Robotics Lab	05/2026-07/2026
Assistant Algorithm Engineer	

- Developed and maintained teleoperation and VR-based data collection pipelines for real-robot manipulation, integrating multi-camera observations with synchronized robot states and timestamps.
- Collected and processed manipulation demonstrations for Vision-Language-Action (VLA) and imitation-learning training, including trajectory inspection, dataset organization, normalization, and quality control.
- Trained, evaluated, and deployed manipulation policies on physical robotic platforms, supporting the end-to-end workflow from dataset preparation and model training to real-time inference.

Eastern Institute of Technology, Ningbo 宁波东方理工大学	04/2025-08/2025
Research Intern	

- Implemented and deployed Action Chunking with Transformers (ACT) and Diffusion Policy for robotic manipulation using LeRobot, Hugging Face's open-source robot learning framework.
- Built an end-to-end imitation-learning workflow covering human demonstration collection, dataset preprocessing, policy training, evaluation, and real-robot deployment.
- Adapted data interfaces and action/state representations for physical robot experiments, and conducted iterative training and evaluation to diagnose policy failures and improve deployment stability.

Honors and Awards

Merit Outstanding Graduate in Fuzhou University	06/2025
First-class General Scholarship in Fuzhou University (Top 1%)	03/2025
Second-class General Scholarship in Fuzhou University (Top 5%)	02/2022

Language & Skills

IELTS Academic: 6.5. (All courses are taught in English in CUHK-Shenzhen)
Programming & Robotics: Python, C++, ROS, LeRobot
